

# Surge Protector User Manual

Read and follow all instructions and warranty information prior to use to ensure protection to connected equipment and warranty compliance.

1. Move power switch into the "OFF" position. Plug the surge protector into a standard grounding duplex wall receptacle. Ensure there are no exposed conductors.
2. Make sure electronic equipment is turned off before plugging into the surge protector outlets. Do not use extension cords to connect equipment to the surge protector.
3. Move power switch to "RESET." Your surge unit should be providing surge protection. Check indicator light(s) periodically (see note). The glowing protected surge indicator light shows surge protection is provided.
4. Connected equipment can now be turned on.

**NOTE:** Check the blue "protected" indicator light periodically. A glowing blue indicator light shows that surge protection is being provided. If the blue "protected" indicator light stops glowing, the surge protective components have expired\* and will no longer provide surge protection. In this event, the Connected Equipment Warranty is no longer valid and the surge protector should be replaced.

## Surge protector — limited-lifetime warranty

Jasco Products Company warrants this surge protector to be free of defects in design, assembly, materials and workmanship for the life\* of the surge protector. If such a defect should arise during the life of the surge protector, Jasco will, at its option, either repair or replace the surge protector without charge. This warranty does not cover damage caused by accident, misuse or alterations to the surge protector, or natural disasters of any kind.

**NOTE:** Do not use this product in any way with a generator, heater, sump pump, water-related device, life-support device, medical device, or car, motorcycle or golf cart battery charger. This product is for indoor use in dry areas only. All warranties of this product are null and void if used in any manner mentioned above.

\*This surge protector, like all surge protectors, has a finite lifespan. Even under normal circumstances and in the absence of defects, the product's life will expire when the surge protector's component capacity has been exceeded, thereby ceasing to provide protection from surges. In this event, the limited-lifetime warranty is no longer valid and the surge protector should be replaced.

## Warranty replacement procedure

1. Call Jasco Consumer Care at 1-800-654-8483 to get a Return Authorization Number (RA#), shipping instructions and a prepaid return address label.
2. After you have received the prepaid return address label, return the Jasco surge protector, freight prepaid, to Jasco. Surge protectors returned to Jasco must have an RA# included in the mailing address to be accepted.
3. The original purchaser will be asked to send the surge protector, a copy of the sales receipt for the product, his/her name, address, phone number and a description of the problem.

## Connected Equipment Warranty

**Equipment replacement guarantee for surge model: 62470**  
**Maximum warranty amount: \$80,000 (USD)**

**Please visit [byjasco.com/cew](http://byjasco.com/cew) for more information on the Connected Equipment Warranty.**

**NOTE:** This device is not a lightning arrestor. It will not afford protection when lightning strikes nearby power lines, the house, service entrance or antenna. The warranty is void if a power disturbance damages your equipment through the coax, phone or network lines.
