

JASCO

7-Point Container Inspection and Agricultural Check

Procedures must be in place to verify the physical integrity of the container structure prior to stuffing, to include the reliability of the locking mechanisms of the doors. A 7-point container inspection is required for all containers. Containers that have damage or appear to have been tampered with are not to be used for Jasco Shipments and should be reported to the carrier immediately. The guidelines of the C-TPAT Container & Seal Inspection Instructions (under separate attachment) should be followed at all times to insure the integrity of the container.

DATE: _____ CONTAINER NO: _____

INSPECTOR'S NAME: _____
