

+

Jasco announces a new integration with Alarm.com to provide residential security system installers with its JascoPro Series professionally designed Wi-Fi-enabled smart lighting solutions. JascoPro Series Wi-Fi devices, which include indoor in-wall switches, dimmers and receptacles, seamlessly integrate with Alarm.com, giving homeowners more advanced home automation and integrated security choices.

- **No hub required — free JascoPro Series app**
- **Mobile or voice control — works with Amazon Alexa and Google Assistant**
- **Wi-Fi or Bluetooth setup and control**
- **Integrated Wi-Fi SKUs — 64556, 64557, 64559, 64562**
- **Only available for professional installation**

Integration Instructions

Step 1 — Alarm.com dealer account

1. Log into Alarm.com Partner Portal
2. On the navigation bar at the top, go to My Business > Business Settings
3. Click Device and Wizard Preferences
4. Under Devices, find JascoPro Series Wi-Fi lighting, check the box under Customer Installation Wizards and click save at the bottom of the page

Step 2 — Every Alarm.com customer account

1. Download the JascoPro Series app in the Apple App Store or on Google Play — note account info for later use
2. In the Partner MobileTech App or Alarm.com Partner Portal, log into the customer account and navigate to the Add Device Portal
 - Partner MobileTech app — Menu icon in the top left > Add Device
 - OR—
 - Alarm.com Partner Portal — Settings > Manage Devices > Add Device
3. Select Lighting and Appliance Control
4. Select JascoPro Series Wi-Fi smart devices
5. Follow the instructions in the wizard to link your JascoPro Series account to Alarm.com

Look for upcoming JascoPro Series Wi-Fi device integrations!
