# Swivel Sconce LED Night Light

Model# 82573

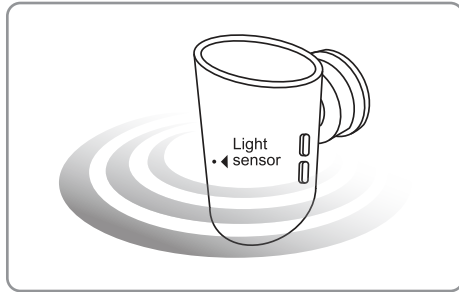

See reverse for easy-to-follow  
instructions and exclusive deals.

# Instructions

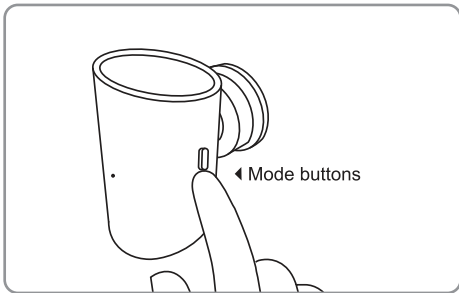

## PLUG IN

Plug the night light into a grounded wall outlet.

## LIGHT SENSING

The light automatically turns on when the room is dark and off when the room is lit.

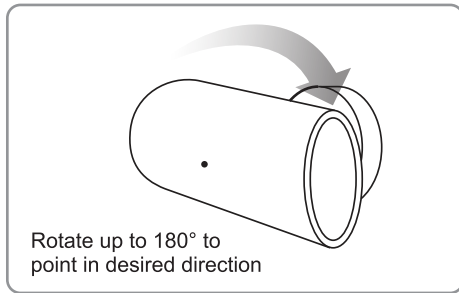

## CHOOSE A MODE

Each LED is independently controlled by its own button. Press and release to choose your favorite color mode.

- |                         |                |
|-------------------------|----------------|
| 1. White light          | 10. Light blue |
| 2. Automatic color fade | 11. Purple     |
| 3. Red                  | 12. Violet     |
| 4. Green                | 13. Pink       |
| 5. Blue                 | 14. Hot pink   |
| 6. Orange               | 15. OFF        |
| 7. Yellow               |                |
| 8. Light green          |                |
| 9. Teal                 |                |

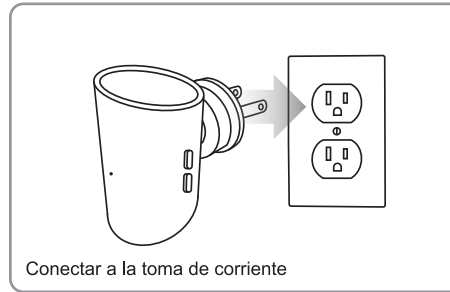

**DIMMING:** Press and hold the button in any single-color mode — the LED will blink when the highest or lowest brightness is reached.

## ROTATE LEDs

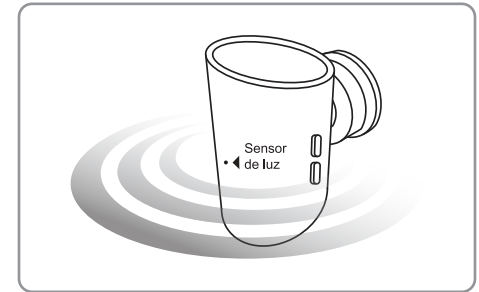

Rotate the night light up to 180° to point the LEDs in the desired direction. **IMPORTANT:** Do not force the rotation, as it can damage the night light.

# Instrucciones

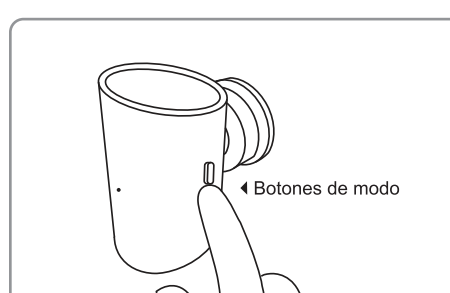

## ENCHUFAR

Enchufe la luz nocturna en un tomacorriente de pared con conexión a tierra.

## SENSIBLE A LA LUZ

La luz se enciende automáticamente cuando la habitación está oscura y se apaga cuando la habitación está iluminada.

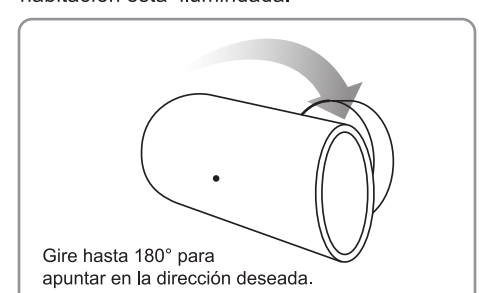

## ELIJA UN MODO

Cada LED se controla de forma independiente mediante su propio botón. Presione y suelte para elegir su modo de color favorito.

- |  |                    |
|--|--------------------|
| 1. Luz blanca                          | 9. Verde azulado   |
| 2. Desvanecimiento de color automático | 10. Celeste        |
| 3. Rojo                                | 11. Morado         |
| 4. Verde                               | 12. Violeta        |
| 5. Azul                                | 13. Rosa           |
| 6. Naranja                             | 14. Rosa brillante |
| 7. Amarillo                            | 15. OFF            |
| 8. Verde claro                         |                    |

**ATENUACION:** Mantenga presionado el botón en cualquier modo de un solo color: el LED parpadeará cuando se alcance el brillo más alto más bajo.

## GIRAR LED

Gire la luz nocturna 180° para apuntar los LED en la dirección deseada. **IMPORTANTE:** No fuerces el giro, ya que puedes dañar la luz nocturna.
