

Fluorescent

12" CLOSET LIGHT

Battery Operated

- Add safety and security to any room
- Ideal for cupboards, closets, attics, basements, storage sheds and garages
- Requires 8 "AA" batteries
- For indoor use only

INSTALLING BATTERIES:

Slide battery cap off end of light and install 8 "AA", 1.5 volt batteries (not included) with polarity as shown on diagram on the fixture. Replace cap. **IMPORTANT:** Different types of batteries or new and used batteries should not be mixed. Exhausted batteries should be removed from the fixture and disposed of properly.

MOUNTING:

Your closet light can be mounted using the supplied adhesive-back "hook and loop" mounting strips.

Note: "Hook and loop" strips should only be used on clean, dry, and smooth surfaces. Do not use on unfinished wood or rough surfaces.

1. Separate the supplied "hook and loop" mounting strips from each other, placing the "hook" and "loop" sides of the strips into two piles.
2. Clean and dry surface before mounting. Peel back paper and apply "loop" mounting strips to both ends and middle of the back of the closet light.
3. Apply the "hook" strips to the desired mounting location, making sure they are the same distance apart as those on the closet light.
4. Press the closet light onto the mounting surface.

NOTE: Allow one day for the adhesive backing to set before attempting to pull closet light away from mounting surface.

Light can also be mounted using supplied screws.

TUBE REPLACEMENT:

1. Remove end caps from light.
2. Remove transparent lens cover.
3. Twist the tube slightly in either direction to remove.
4. Replace with 8-watt, 12" T5 bulb.
5. Replace tube cover and end caps.

CAUTION:

Do not turn on light with tube disconnected to avoid possible damage to solid state circuit.

! WARNING

Batteries may leak harmful liquids or ignitable materials or explode causing injury or product damage

- Do not mix old and new or other battery types
- Replace all batteries at the same time
- Replace fully discharged batteries immediately
